

# 3 Kick

For kids.....

... and experts

## Compact Speed & Reaction Game

3 Kick is an interactive game that tests the players speed, agility and reactions. A simple game to set up and operate 3 Kick can be considered a fun game or an alternative and enjoyable work out. Each round is a timed event and the object is simply to strike the illuminated pad as quickly as possible. Each time you strike one illuminated pad another will illuminate accompanied by a variable pitched sound. The sequence in which the pads light up is completely random and the faster the pad is hit the more points the player will score

- 2.2m diameter ring and Corner Kick models with choice of framework colours (approx. 3.5m x 2m)
- Control box (see bottom right) doubles as token mechanism and displays time and score
- Competitive nature of the game breeds repeat play and challenges players to beat the high score
- An active and refreshing alternative to passive computer based arcade style games
- Does not require a dedicated operator helping keep your staff requirements down
- Incredibly easy to operate and maintain
- Child mode option where only the lower 6 pads are used. Changed with flick of a switch.
- Option to fit UK/Euro coin mechanism or standard token mechanism provided
- Electrical Requirements: 220 Volts, single phase, rated at 1 amp, 50Hz

3 Kick (2.2m diameter ring)

Corner Kick (3.5m x 2m)

Control cabinet with coin mech.
